

Project Management

	MON	TUE	WED	THU	FRI	SAT	SUN
Week 12	Check the Project requirement and read the paper (Wei, Luo, Han, Li)				Determine the method required by the code, using java to achieve the basic method (Wei, Luo, Han, Li)		
Week 13	Debugging and write pseudocode (Wei, Luo)			Weekly group discussion (Wei, Luo, Han, Li)	Debug and multithreading optimization (Han, Li)		
Week 14	Code structure optimization (Wei, Luo)		Code analysis (Li)		Result analysisand optimization (Han, Li)		Make ppt for presentation (Wei, Han, Li)
Week 15	Presentation (Wei)	Finish the final report and other materials (Wei, Luo, Han, Li)					

11811516 Wei Jinqi: Normal and Strassen algorithm, code structure optimization.

11811314 Luo Peiyu: Basic matrix method and paper, result analysis and debugging.

11812519 Han Xudong: Pseudocode and parallel algorithm, examination of papers.

11813223 Li Xingze: Parallel algorithm optimization and debugging, theoretical analysis.
